Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on Aug 11, 2001
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

1. Hydrophobically modified nonionic cellulose ether
2. Quaternary ammonium cellulose ether
3. Anionic cellulose ether

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Art Unit: 1751

Claims 3 and 4 correspond to species 1, claims 5 and 6 correspond to species 2, and claims 7 and 8 correspond to species 3.

The following claim(s) are generic: claim 1

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The different cellulosic ethers have completely different structural groups, and so different structures and properties.

4. During a telephone conversation with Julie Glaser on February 11, 2002 a provisional election was made with traverse to prosecute the invention of species 1, claims 1-4, 9, and 10.

Affirmation of this election must be made by applicant in replying to this Office action. Claims 5-8 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-4, 9, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Harmalker et al, US 5,308,513.

Harmalker et al teach fabric conditioning aqueous liquid emulsions which are wash cycle additives for through the wash use (see abstract). An example of such a composition is a liquid emulsion containing hydroxyethylcellulose polymers, citric acid, and a nonionic surfactant which is added to a granular detergent containing surfactants and builders (see examples 2 and 4). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

8. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Elliott et al, WO 96/17917.

Elliott et al teach liquid personal cleansing compositions (see abstract). An example of such a composition comprises 6% alkyl ether sulfates, 0.3% modified hydroxyethylcellulose polymer, and 1% preservative containing EDTA (page 23, example V). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.
